

# SUN SOLUTIONS

## DELIVERING ACCURATE QUALITY CONTROL

Three ambitious entrepreneurs started Sun Inc. 31 years ago. From the onset, the goal was to provide manageable solutions for their present and future clients, which included many relentless efforts to make these projects a success. With that forethought and insightful determination, the foundation was laid for what is now Sun Solutions with eight locations spanning three states. The founders Kathi Cook, Philip Morris, and Andy Cook have surrounded themselves with a team of the best in the industry, and as they did in the beginning they are always looking ahead to where the industry is going and what their customers' needs are.

Sun Inc. rebranded in 2012 and changed their brand from being known as a printer to Sun Solutions, a comprehensive graphic media provider. This change is part of our evolving transformation, providing solutions in a majority of the graphic media industry. Sun Solutions offers clients a complete solution to all their graphic and advertising needs.

*Pictured from left to right, Philip Morris, Kathi Cook, and Andy Cook founded Sun Solutions (then Sun, Inc.) more than thirty years ago.*

These solutions include commercial printing, packaging, digital printing, wide format graphics, direct mail, fulfillment and design. Sun is a "yes" mentality company whose outlook is focused on the positive. Their philosophy is "If you can dream it...we can print it."

Sun Solutions has established itself as a trendsetter in the industry. The unique ability to produce just about anything in-house allows Sun to provide a total color-coordinated solution for our customers. As a G7 certified company, Sun Solutions uses modern technology, and adheres to strict standards and modern processes that bring science into the art of color matching and printing.

This not only sets them apart from other printers but it gives Sun's clients the assurance that the solutions

provided are based on leading edge methodology for matching color and delivering consistent, quality results. Sun has and continues to invest in the most technologically advanced, state-of-the-art equipment available in the industry to give their clients assurance in these areas.

"We are excited about the future of our industry and the technology we embrace to provide superior quality and service to our clients" explains Kathi Cook, CEO and majority stock holder. "We have experienced more changes in the last few years than we did in the first 25 years combined. For those investing in cutting-edge equipment, these are very exciting times."

The demand for consistent high quality and fast turns has been a challenge that Sun has accepted and has seen much success. Sun is always recruiting, training, and hiring the top talent in our industry.

Sun Solutions takes pride in being G7 Certified, which has facilitated a comprehensive solution to color management throughout all facilities and printing devices.

Before achieving this certification, color control varied from offset to grand format to web offset. With proper fingerprinting and calibration, all devices work from the same color quality standards to achieve consistent matched color.

\* – Sun Solutions is FSC certified and promotes eco-friendly inks and recycled papers, and proud to be a woman-owned business.
